INTRODUCTION

Founded in 1953, Harbin Engineering University (HEU) stands as China's national key universities of "211 Project", setting up Graduate School approved by China's Ministry of Education, "National Superior Discipline Innovation Platform Project", and listed in the first batch of universities for the "Excellent Engineer Education and Training Program" and "Double First-class" initiatives for universities.

HEU focuses on science and engineering, and maintains a harmonious development across other fields including management and humanities. In China, the discipline of Naval Architecture and Ocean Engineering ranked TOP 1, Nuclear Science and Technology ranked TOP 3 in China, and Control Science and Engineering ranked TOP 6. The University adheres to a high level of opening up and cooperation with the internationalization and globalization, extensively carries out international academic research, educational cooperation and cultural exchanges, attracts high-quality educational talents at home and abroad, carries out high-level international cooperation in running schools in accordance with laws and regulations, and to enhance the university's international influence and competitiveness. Currently, there are more than 1,500 international students on campus from 90 countries all over the world.

HEU has currently signed agreements on exchange program with more than 100 universities and institutes worldwide. We welcome students from the partner universities and institutes to study in the exchange programs in HEU. Exchange students to HEU can study in the regular degree programs conducted in English or Chinese, carry out scientific research, and join in Chinese language programs to experience China and Northeast Culture. The exchange program extends from one semester to two semesters in the academic program or Chinese language program.
